MOUTH CANCER ACTION MONTH
NOVEMBER 2019
Hello, welcome and thank you for supporting Mouth Cancer Action Month – a campaign which aims to address and tackle the growing number of cases of mouth cancer in the United Kingdom.

At the Oral Health Foundation, we want to get more mouth cancers diagnosed at an early stage by raising awareness of the disease while encouraging everybody to be more vigilant about changes in their mouth. Mouth Cancer Action Month is a campaign which aims to do just that. But we can’t do it alone. We need your support.

Cancer is one of the leading causes of death across the world. It’s likely that most, if not all of us will be impacted in some way by the condition, whether we are diagnosed with it or a loved one is. Either way, coping with cancer is one of the toughest challenges that we will ever face.

The threat is growing, at least as far as mouth cancer is concerned. Diagnoses have grown by more than 40% in the last decade alone. It is also one of the few cancers which is predicted to continue to rise in the coming years. We need your help to change that.

This November, we want to work with you to help provide the very best information to everyone who could be affected by mouth cancer.

We know that the vast majority of Brits simply do not know enough about the disease. This must change, and we want to work with you to make that happen.

We want more people to know how they can detect mouth cancer early. This means being vigilant and regularly checking their mouth for signs of cancer. It is also about acting quickly if they spot anything unusual in or around their mouth and seeking the help of a dentist or doctor.

It is also important that more people know what causes mouth cancer and adopt a healthier lifestyle to reduce their risk.

Ultimately, it’s all about being mouthaware. Throughout November, we want to see as many events, activities and fundraisers as possible across the UK. Spreading vital information about the disease could literally save lives.

Over the years we have seen some fantastic support for the campaign, and we hope that we can all once again come together and make a positive difference to the landscape of mouth cancer.

Please help us promote the benefits of good oral health and spread the word that when mouth cancer is picked up earlier, treatment is more likely to be successful.

Make it clear to everybody you know that cutting down on habits like smoking and drinking too much alcohol could make a huge difference and help reduce our risk of mouth cancer.

Help us make sure that the nation is aware that a quick trip to the dentist could really save their life. You will agree with us that mouth cancer needs more recognition and something needs to change. Let’s make a stand and speak out against mouth cancer this November.

The success of Mouth Cancer Action Month would not happen without the support of Simplyhealth Professionals. Their long-standing support of the campaign and continuous contributions towards it really to make a massive difference and without them, the campaign simply would not be possible.
The aim of Mouth Cancer Action Month is to create a more mouthaware nation. You can play a big part in helping us achieve our goal by sharing a very clear and simple phrase – ‘IF IN DOUBT, GET CHECKED OUT.’ We want everybody to pay close attention to what’s going on inside their mouth and take urgent action if they spot any unusual or unexplained changes.

Mouth cancer can strike in a number of places, including the lips, tongue, gums and cheek. Given that early detection is so crucial for survival, it’s essential that you tell staff, patients and those within your local community what the main warning signs to look out for are.

Three signs and symptoms not to ignore are:
- Ulcers that do not heal within three weeks.
- Red and white patches in the mouth.
- Unusual lumps or swellings in the mouth or head and neck area.

During November’s campaign, we will be encouraging everybody to get into the habit of checking their mouth for signs of cancer. If any of these common symptoms are spotted, a dentist or doctor should be seen immediately.

Mouth cancer does not discriminate. It really can affect anybody. However, it is strongly associated with the age and gender of a person. Mouth cancer is more likely to be found in men over 40. Lifestyle is also important, with around nine in every ten cases linked to risk factors like tobacco and alcohol.

The ultimate success of the campaign depends on your support. Use your voice to help us remind people how important it is to pay attention to the changes in and around your mouth.

RE DUC IN G O U R R IS K

Mouth cancer does not discriminate. It really can affect anybody. However, it is strongly associated with the age and gender of a person. Mouth cancer is more likely to be found in men over 40. Lifestyle is also important, with around nine in every ten cases linked to risk factors like tobacco and alcohol.

This shows just how much of an influence our daily choices and habits can have on our overall health. But by amending them, making small steps towards healthier day-to-day choices, we can help cut the chances of developing mouth cancer.

The five key risk factors that we want to encourage people to address are:

- **Tobacco** This is the leading cause of mouth cancer. Tobacco transforms saliva into a deadly cocktail that damages cells in the mouth and can turn them cancerous.

- **Alcohol** Excessive drinking of alcohol is linked to more than a third of mouth cancer cases in men and a fifth in women. Heavy drinkers and smokers are up to 35 times more at risk.

- **HPV** (the Human papillomavirus): The world’s most common sexually-transmitted virus is being linked to the growth of mouth cancer cases and is expected to become the leading cause of the disease in the near future. It’s the world’s most viral secret and during November, we want to put it under the spotlight.

- **Diet** Research shows that a diet high in fresh fruit and vegetables can reduce the risk of developing mouth cancer.

- **Chewing or smokeless tobacco** Smokeless and chewing tobacco like betel quid, is not a ‘safe’ alternative to traditional cigarettes and is very common across Asia, Europe and the USA.

WWW.MOUTHCANCER.ORG
TELL US YOUR STORY

Every year, more than 8,300 people in the UK are diagnosed with mouth cancer. In many cases, it has a substantial and lasting impact on a person’s quality of life – even down to the ability to talk, eat and breathe.

During Mouth Cancer Action Month, we want to give a voice to those who have had theirs threatened by the frightening prospect of mouth cancer.

We want to hear from people who have had experience with the disease. We believe that an important part of spreading awareness of this horrible disease is sharing the stories of people who have lived through it or had it impact their life in some way.

Whether you are survivor, a relative of someone who has had the disease or a dental professional who wants to talk about diagnosing mouth cancer from their perspective, we want to hear from you.

Use your voice to help us save lives.

Get in touch with the Oral Health Foundation if you have a story to tell by emailing pr@dentalhealth.org

Ignoring mouth cancer won’t help us beat it. We must speak out against it now.

WE NEED YOUR ACTIVE SUPPORT

We want to help support and facilitate events and projects which raise important awareness of mouth cancer so that ultimately, we can save lives through early detection.

Since you are at the forefront of patient care, the Oral Health Foundation would like to work with you this November to engage and educate members of the public. By promoting healthier lifestyles and drawing greater attention to the risk factors and signs and symptoms of mouth cancer, we can not only reduce the incidence of the disease, but we can also help improve the general health and wellbeing of millions of people across the UK.

WHAT YOU CAN DO

Getting involved and supporting Mouth Cancer Action Month is easy. It can also make a big difference to your staff, patients and wider community.

There are so many ways that you and your team can help raise awareness of mouth cancer and show your support during the campaign. Here are some of the most popular ways you can get involved this November:

DISPLAYS
Use Mouth Cancer Action Month as an opportunity to decorate waiting rooms and reception desks with education and information about risk factors, signs and symptoms. Get creative, the only limit is your imagination!

MOUTH CHECKS
Organising open days where non-patients can undergo a mouth cancer examination is a good practice builder and can help the local community and those without access to dental care. In the past, through days like these, countless people have received invaluable information about mouth cancer and some cases of the disease have been caught. A routine visit to the dentist could save a person’s life. We need to make sure the door to your practice is open to all.

WORKSHOPS AND TALKS
Through these you can target higher risk groups by visiting local groups and workplaces. They are also a great opportunity to provide information and advice in an informal environment for those who do not attend a dentist regularly. Sessions like these could make the world of difference to people in your local community.

BLUE WEDNESDAY
November 13th is Blue Wednesday. A really fun team-building event that can be highly effective for raising awareness with patients and especially on social media. How blue can you go for Mouth Cancer Action Month? For more information, head to www.dentalhealth.org/bluewednesday.

#BLUELIPSELFIE
From our main sponsors, Simplyhealth Professionals, #BlueLipSelfie is a fun, positive campaign which helps raise awareness of mouth cancer. #BlueLipSelfie encourages everyone to wear blue lips as a visible sign of support for Mouth Cancer Action. To find out more, head to www.bluelipselfie.co.uk.

SOCIAL
By posting about the disease on social media, you have the potential to reach huge audiences. Social media is your opportunity to get others involved in Mouth Cancer Action Month by communicating positive message about the disease.
Aid patient communication and education.

Our Blue Ribbon Appeal plays a key role in directly engaging people with the issues surrounding mouth cancer.

With 8,300 new cases diagnosed this year, an increase of 49% over the last decade, dental professionals have a significant impact on these disturbing figures. Both professional and public awareness is more important than ever before.

Please support this vital oral health campaign and educate your patients about being mouth aware and their self examination.

EDUCATIONAL RESOURCES

Aid patient communication and education.

Our Blue Ribbon Appeal plays a key role in both engaging the public, and raising much needed funds for action against mouth cancer, enabling us to create and provide educational materials.

With 8,300 new cases diagnosed this year, an increase of 49% over the last decade, dental professionals have a significant impact on these disturbing figures. Both professional and public awareness is more important than ever before.

If you are looking to take on a challenge, have some fun and raise money for a great cause, you should consider fundraising for Mouth Cancer Action Month. It can be as simple or extravagant as you choose.

As an entirely self-funded charity, we rely on your fantastic support and every single penny you raise truly goes a long way to help us continue to drive awareness of this horrible disease. From raffles and tombolas to runs and cycle rides, there are plenty of activities for everyone to get involved in.

RUNS, WALKS AND CYCLES
A local fun run, a marathon, cycling across the country or a triathlon. All physical activities to accomplish a goal, inspire others and raise awareness and money for a good cause.

MUD RUNS
If you’re looking for a fun and thrilling alternative to the traditional marathon, a mud run could be just right for you. Get your friends and family involved and encourage them to do some fundraising of their own. By the end you’ll be sure to have plenty of good stories to tell and raised money for a wonderful cause in the process.

EXTREME CHALLENGES
For the adrenaline junkies among you, looking to tick off something on your bucket list, an extreme challenge may quench your appetite for excitement. It’ll be a day you’ll never forget. Mouth Cancer Action Month is a fantastic excuse to face your fears and really show your support for the campaign.

QUIZZES, AUCTIONS AND OTHER CHALLENGES
If you’re looking to keep your feet firmly on the ground, there are still plenty of fundraising options open to you too. You can run a quiz night for friends and family. You could offer an amazing gift or perhaps a small present for a charity auction. Why not challenge yourself by opting to do a sponsored pledge and give up smoking or alcohol to get people to support you in your endeavour and raise money while you’re at it.

The only limit is your imagination. No matter what you decide or how much you raise, every donation gets us closer to preventing more lives being lost to this disease.

WWW.MOUTHCANCER.ORG
BLUE RIBBON APPEAL

We are eager to give you as many ways of showing your support for Mouth Cancer Action Month as possible. Wearing a Blue Ribbon badge is a small gesture, but it really could make the world of difference.

There are now more than 250,000 of you wonderful supporters who are wearing the enamel Blue Ribbon with pride. Pinning it on your clothing can prompt conversations about mouth cancer and encourage more people to pay closer attention to what’s going on inside their mouths – something that one day could save their life.

Even more than that, the badge acts as a symbol of solidarity.

It is a sign that we stand together united against mouth cancer. We stand together in support of the countless people who have been affected in some way by this terrible disease. We stand together to drive change and help share life-saving information about the disease.

We want you to join us. Buy one for yourself, get your family, friends and colleagues to pitch in too. Each Blue Ribbon badge costs just £1 and that money goes a long way in helping us to achieve our charitable goals.

STATISTICS

This is just part of why we need you to show your support for Mouth Cancer Action Month 2019 on November 1st.

8,302 people have been diagnosed with the disease over the past year

1 in 6 mouth cancers are directly caused by smoking

2,722 Brits lost their life to mouth cancer last year

49% increase in mouth cancer cases in the last 10 years

More than 1 in 10 still have not heard of mouth cancer

56% of mouth cancers appear on the tongue or tonsils

1 in 6 mouth cancers now account for just over 2% of all cancers

135% increase in the last 20 yrs

Early diagnosis improves survival rates from 50% to 90%

More than 3 in 4 of new cases are in those over 55

½ men & ½ women

EXCESSIVE ALCOHOL USE is linked to 1 in 3 cases

14th most common cancer in the UK

BLUE WEDNESDAY

Alongside the Blue Ribbon Appeal, we are asking you to help support this year’s campaign by taking part in Blue Wednesday on November 13th. Whether it’s as simple as an item of clothing, or something as bold as blue lipstick, your involvement can help spread the message and ultimately save lives.

Over recent years we have seen some fantastic support on Blue Wednesday from funky outfits to brilliant decorations. Your support on the day plays a huge part in promoting the importance of being mouthaware, something we can all get behind.

The day can also prove to be a really fun team-building event and you can shout about all the wonderful blue-themed things you’ve been up to on social media.

So, when Blue Wednesday rolls around, wear something blue, put on a Blue Ribbon badge, hang up blue bunting all over your practice and encourage others to do the same!

If you do post any pictures on social media on the day, don’t forget to use #BlueWednesday!

STATE OF MOUTH CANCER UK REPORT 2019/20

Last year, we published the first comprehensive review into mouth cancer.

For 2019’s campaign, we will again delve into the very latest statistics for the disease. The report will include new figures on diagnosis across the UK, survival rates and how the landscape has changed over time.

We will also discuss the nation’s awareness of mouth cancer. Specifically, how much is known about the risk factors and common symptoms of the disease.

The report, which will be published on November 1st 2019, will also explore some key recommendations from the Oral Health Foundation for the future. How we can tackle the rising rates of the disease, raising awareness of the key risk factors associated with the disease and how related topical issues like the new gender-neutral HPV vaccination programme can play a vital part in changing the landscape of mouth cancer in the years to come.

WWW.MOUTHCANCER.ORG
Your support over the past few years has been instrumental to the success of Mouth Cancer Action Month and how far and wide we can spread vital messages about mouth cancer. Prevention and early detection of mouth cancer are two ideals that we strive towards and your donations help us get a step closer.

Our Mouth Cancer Appeal is here to help reduce these numbers by making more people aware of the causes, signs and symptoms of mouth cancer.

All proceeds from our Mouth Cancer Action Appeal will go towards putting oral health information in the places that they are needed. Local pharmacies and doctor’s practices up and down the country, where those who are most at risk are most likely to see it and be influenced by it.

Help us make a change today. Head to www.mouthcancer.org for more information and to donate to this great cause. Together we can save lives.
